Collective Consciousness
@1996
lyrics/Music/Melody: Kathyjo Varco

There has to be more than this
Land of Freedom is a myth
Make your speach, sing your song
But do not tell them what is wrong
The picture's clear to me
I've seen the systematic killing spree

We gotta move to a collective mind
We gotta fight for basic human rights
This is our day to walk the earth in a collective consciousness
It's our time to break the ancient ties
Right about now it comes together
Get a better view in a collective consciousness
Collective consciousness, are you catching on?
are you catching on?

Twist sight and sound
Shape your eye
Fools and Thieves who bide their time
Take they will, as they wish
Scattered means thrown to exist
The pictures clear to me
The Socialistic in poverty

We gotta move to a collective mind
We gotta fight for basic human rights
This is our day to walk the earth in a collective consciousness
It's our time to break the ancient ties
Right about now it comes together
Get a better view in a collective consciousness

Keep them down, watch their plight
Pull their string watch them fight
So it seems they've figured out just how to get to me
Feeling's all around
Smell it in the air
Tension is mounting
Revolution's at hand

We gotta move
They don't discriminate—do it to us all
Are you catching on?

(chorus) vamp out
